Investment Philosophy & Approach

The Fund seeks long-term capital appreciation and pursues its goal by investing in at least three different countries and at least 40% of its total assets in securities of non-U.S. issuers organized or having their principal place of business outside the U.S. or doing a substantial amount (more than 50%) of business outside the U.S. The Fund's non-U.S. investments will be primarily in developed markets, but the Fund may invest in emerging markets. There are no geographic limits on the Fund's non-U.S. investments.

The Fund may invest in companies of any size and targets a balanced approach with allocations across the market capitalization spectrum. We use a fundamental, bottom-up approach to identify what we believe are quality companies, as evidenced by the durability of the company's business model, the company's financial strength, the presence of long-term growth, and value-accretive management teams.

Seek companies that appear to have the following characteristics:

- Strong management, sound financial practices, and a defensible business niche
- Focus on firms with sustainable growth in earnings, revenue, and cash flow
- Identify undervalued equities that are temporarily mispriced relative to their long-term potential and where their stock prices reflect reasonable valuations

Performance

	Quarter	YTD	1 Year	3 Years	5 Years	Since Inception (12/27/2017)
RMBTX	+9.22%	+19.40%	+10.19%	+11.66%	+8.11%	+2.74%
MSCI EAFE Index*	+11.78%	+19.45%	+17.73%	+15.97%	+11.16%	+6.38%

The performance data quoted represents past performance and is not a guarantee of future results. The investment return and principal value of an investment will fluctuate, so that those shares, when redeemed, may be worth more or less than their original cost. All returns reflect reinvested dividends, but do not reflect the deduction of taxes that an investor would pay on distributions or redemptions. Current performance may be lower or higher than the data quoted due to market volatility. Returns longer than one year are annualized. All data as of 6/30/2025 unless otherwise noted. To obtain performance as of the most recent month end, please call 800-462-2392.

Holdings are subject to change. The holdings listed should not be considered a recommendation to buy or sell any security listed.

Ticker	Class	CUSIP	Inception Date	Gross Expense Ratio	Net Expense Ratio	Minimum Investment	Sales Charge	Redemption Charge
RMBTX	I	74968B860	12/27/2017	1.00% (5/1/25)	N/A	\$100,000	0.00%	0.00%

Curi Capital, LLC (the "Adviser") has contractually agreed to reduce its compensation due from and/or assume expenses of the Fund to the extent necessary to ensure that the Fund's operating expenses (excluding interest, taxes, brokerage commissions and other transaction costs, expenditures that are capitalized in accordance with generally accepted accounting principles, acquired fund fees and expenses, short sale dividends, and extraordinary expenses not incurred in the ordinary course of business) do not exceed 1.00% of the average daily net assets of the Fund's Class I shares (the "Expense Cap"). The net expense ratio is higher than the gross expense ratio as a result of expense reimbursement. The Expense Cap is in effect until April 30, 2026, and cannot be terminated prior thereto without the approval of the Fund's board of Trustees. To the extent the Adviser waives its compensation and/or absorbs expenses to satisfy the Expense Cap, it may seek repayment by the Fund of a portion or all of such amounts at any time within three fiscal years after the date on which such amounts were waived or absorbed, subject to the expense caps in effect as of the date (i) such amounts were waived or absorbed and (ii) of the repayment.

Investment Terms: **Annualized Rate of Return** is the geometric mean return of the portfolio calculated for a one-year period. **Active Share** is a measure of the percentage of stock holdings in a manager's portfolio that differs from the benchmark index. **Turnover Ratio** or Turnover Rate is the percentage of a mutual fund or other portfolio's holdings that have been replaced in a 12-month period. **Weighted Average Market Capitalization** refers to a type of stock market index construction that is based on the market capitalization of the index's constituent stocks; large companies would, therefore, account for a greater portion of an index than smaller stocks.

The performance of the MSCI EAFE® Index assumes the reinvestment of all distributions but does not assume any transaction costs, taxes, management fees or other expenses. It is not possible to invest directly in an index.

*Source: MSCI. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indexes or any securities or financial products. This report is not approved, endorsed, reviewed or produced by MSCI. MSCI Europe, Australasia, and Far East (EAFE®) Index is an equity index which captures large- and mid-cap representation across Developed Markets** countries around the world, excluding the U.S. and Canada. With 924 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

**Developed Markets countries in the MSCI EAFE Index include: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the U.K.

All investing involves risk including the possible loss of principal. There can be no assurance that the Fund will achieve its investment objective. Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the Fund please visit rmbfunds.com or contact RMB Investors Trust at 855-280-6423. Read the prospectus or summary prospectus carefully before investing.

The Fund invests in foreign securities which may be less liquid, subject to currency-rate fluctuations, be in areas with political and economic instability and be subject to less strict regulation of the securities markets. These risks are greater for investments in emerging markets.
