Class I	\$95	0.95%

HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

The Fund underperformed the Russell 3000® Index since risk controls are aligned with the Russell 2000® Index. With respect to the Russell 2000® Index, the Fund’s overweight to profitable, higher quality names drove the Fund’s underperformance this year. Profitable companies lagged unprofitable companies in 2025. Investor enthusiasm for speculative AI related verticals and biotech names drove an approximately 21% performance gap between unprofitable and profitable companies. Longer term, we believe that focusing on higher quality companies with solid track records of value creation in both growth and value universes should help performance against broader indices.
